🎓 EDUCATION

City University of Hong Kong

Doctor of Philosophy
Electrical Engineering

09 2023 ~ 08 2027 (Est.)

Hong Kong SAR, China
3.92/4.0

Beijing Institute of Technology

Master of Science
Information and Communication Engineering

09 2020 ~ 06 2023

Beijing, China
Municipal Outstanding Graduate

Beijing Institute of Technology

Bachelor of Science
Electronics and Information Engineering

09 2016 ~ 06 2020

Beijing, China

🏆 AWARDS

- Exemplary Reviewer of IEEE COMMUNICATIONS LETTERS 12 2024
- CityU Academic Excellence and QE Award 09 2024
- Entrance Fellowship of CityU Graduate School 09 2023
- Beijing Municipal Outstanding Master Graduate 06 2023
- **Hong Kong Ph.D. Fellowship Scheme (HKPFS) Awardee** 04 2023
- 2021 **National Scholarship** (~ 0.2%) for Graduate Students 09 2021
- OPPO AI Wireless Contest 2nd Prize 08 2021
- 2020 **National Scholarship** (~ 0.2%) for Graduate Students 09 2020
- Meritorious Winner (~ 4%) in Mathematical Contest in Modeling (MCM). 04 2019
- **1st place** in National Undergraduate Algorithmic Game Theory Championship. 08 2018

⚙️ RESEARCH

Massive Movable Antennas in Near-Field Communications

Funded by HKPFS and GRF Hong Kong. Supervisor: Prof. Xianghao YU 08 2025

- **Pioneered** the Antenna Density Function (ADF) concept, a novel analytical tool providing the first tractable model to analyze and optimize massive movable antenna systems in the near-field. [J2]
- Derived the first-known closed-form optimal antenna positions for near-field communication maximizing achievable rates [J1, J2].
- Derived the **analytical solution** of optimal discrete antenna positions with asymptotic analysis [J1, C1].

Sensing Assisted Channel Estimation for Near-Field XL-MIMO

Funded by HKPFS and GRF Hong Kong. Supervisor: Prof. Xianghao YU 09 2024

- Propose to adopt **back-projection** based algorithm for near-field localization with significantly **reduced complexity** [J3].
- Further utilize the estimated location coordinates for channel estimation/beamfocusing [C2, C3].

Learning-based Communication Signal Processing with XL-MIMO

Funded by Beijing Municipal NSF. Supervisor: Prof. Zhen Gao 06 2023

- Channel estimation and CSI feedback techniques with XL-MIMO antenna arrays [J5, C5, C7].

- Semantic communications for texts [C4].

Reconfigurable Intelligent Surface (RIS) assisted Wireless Commun.

Funded by Beijing Municipal NSF. Supervisor: Prof. Zhen Gao

09 2019

- Designed architectures and algorithms for RIS-assisted MIMO-OFDM systems.
- Proposed an OMP-based uplink channel estimation method to efficiently reconstruct the **sparse channel matrix** with low overhead. Enhanced the estimation performance with denoising neural networks [J4].
- Proposed an AMP-based user detection method to achieve grant-free multiple access [J7].

✂ TECHNICAL SKILLS

- **Coding:** Skilled in **MATLAB** and **Python** for communication system algorithm simulations and AI-related algorithms. Available for **C++**, **Verilog**, and **ASM**.
- **Languages:** Mandarin (Native); English (FLuent, **IELTS: 7.5** (L/R/W/S: 8.5/8/6.5/6.5)).

✍ SERVICES

- **Academic**
 - **TPC Member**, *Wireless Communication*, ICC'26, Glasgow, Scotland, UK. 12 2025
 - **Session Chair**, *Antenna and Smart Antenna*, GLOBECOM'24, Cape Town. 12 2024
 - **Session Chair**, *Mobile and Wireless Networks*, ICC'23, Dalian, China. 08 2023
 - **Peer Reviewer**, IEEE ComSoc/SPS Journals and Conferences.
- **Teaching**
 - **Research Assistant** at Dept. EE, City University of Hong Kong. 08 2024 – 10 2025
 - **Teaching Assistant:**
 - * EE3008 Principles of Communications, City University of Hong Kong Fall 2024
 - * EE3008 Principles of Communications, City University of Hong Kong Spring 2024
 - * EE3008 Principles of Communications, City University of Hong Kong Fall 2023
 - * Innovation and Entrepreneurship Projects, Beijing Institute of Technology Spring 2023
 - * Frontiers of Communication Technology, Beijing Institute of Technology Spring 2022

🧰 INTERNSHIP

ByteDance Ltd.

Beijing, China

Researcher and Developer

06 2022 – 09 2022

- Implementation research on multi-path UDP transmission schemes under real-time communication (RTC) scenario.
- Optimization of RTC transmission protocols on packet scheduling and buffering strategies.

Cambricon Technology

Beijing, China

Hardware Developer

08 2019 – 09 2019

- Application Specific Integrated Chips (ASIPs) for neural network calculation acceleration.
- Software development for deploying Inception V3 model on Cambricon ASIPs by C++.
